

Meet your Homie.

AI-powered rental search across ibilik, iProperty, and Facebook - normalized, scored, and explained. Let Homie find your perfect home.

START RENTAL HUNTING →

Problem Statement

Finding a rental is **overwhelming**. Information is scattered, agents are unresponsive, and listings are often misleading or outdated.

Scattered Information

Rental listings are spread across Facebook, Instagram, iProperty, and countless other platforms.

Unresponsive Agents

Agents don't reply, or spam you with units you never asked for.

Misleading Locations

"5 mins to LRT" actually means a 20-minute walk around highways and drains.

Outdated Listings

Beautiful units that were rented months ago or prices that have changed.

User Story

“

Ali is a worker moving to KL for work, but he does not have time looking through different platforms and dont know much about the strategic location in KL.

Confusing Renter

“

Sarah, a 2nd year university student and 4 of her friends are looking for a room, all of them has different budget, finding rooms from different platforms but they could not come up with a summary.

Frustrated Rent Hunter

“

Lee found many rental posts on Facebook and Red Note, but all requires him to manually pm them to ask for availability.

Overwhelmed Renter

Who Wins with Homie?

STAKEHOLDER	BENEFITS & TRANSFORMATION	
 Renters	 Strategic Discovery Browse <u>ranked shortlists</u> , request inquiry drafts. Explainable scoring, verified walking distances.	 Automated Outreach Secure viewings faster with automated outreach that manages first-touch communications instantly.
 Agents / Landlords	 Structured Intake Receive <u>structured inquiries</u> from potential tenants that contain all required data points upfront.	 Lead Quality High-quality leads and clear, professional initial contact that minimizes screening friction from minute one.
